

When I Went to Yosemite

by Samantha Yin

Oh my, what a vacation I had. You want me to tell you? Okay. First, when I got to Yosemite, I met a friend. His name is Kanden. My brother was playing with him. Next, I went to a campsite with my family. We were going to stay there. Also, I'm going to tell you three fun facts about Yosemite. First, Yosemite is the third national park. Second, Yosemite's granite rock formations glow like fire at sunset. Last, Yosemite Valley was formed by glaciers. Now where was I? Ah, so I went hiking a lot. I mean a lot. My legs hurt so much. Guess what I saw when I was hiking? I saw ginormous trees. They were so big, but they weren't the biggest trees ever. We stayed in Yosemite for about a week. I saw a lot of animals too. I saw a deer, lizards, birds and more. I also saw a big and really pretty waterfall. It was magnificent. My dad took lots of pictures of the waterfall. I think it was my first time seeing one in real life. Then I went to a lake called Mirror Lake. It wasn't that big like the Salton Sea which is the biggest lake in California. Anyway, I saw this road and above it was two gigantic boulders. They were barely touching each other. It looked like it was going to fall and block the road. It was really cool. My dad took a picture of it. I went to Yosemite with my grandma, my mom, my dad and my brother. At dinner, there were also very limited food choices over there. I was getting so tired of it. There was only like hamburgers, hotdogs and other stuff. I also got to see the sunset and the sunrise in the morning. It was really pretty. I loved the sunset more than the sunrise. I loved everything I saw in Yosemite. My favorite part was spending time with my family. We also made smores. They were so good. We also roasted just marshmallows by itself. They were good but not as good as the smores. We also cooked instant noodles and steak which is my favorite food. I also didn't shower the whole time. I was in Yosemite. I felt very sticky, and I smelled horrible. Also, this might sound crazy but I think I heard a bear at night. I think my parents heard it too. My parents heard that the bear ate some of the dog food that other people had. It was a black bear, and black bears are big. Then, after all the stuff that I did in Yosemite, I went home. I fell asleep in the car. I remember all of this just by remembering the big black bear eating the dog food. This was such a fun trip and a great way to spend time with my family.
